

CHOOSE OK ALONE TO MONITOR THE SAFETY OF YOUR DRIVERS

Provide reliable protection and ensure the safety of your lone workers and drivers. Ok Alone's lone worker monitoring system was developed with input from drivers and safety professionals in mind, making it a practical and functional solution for your fleet. Drivers use the mobile app to check-in, request help, and send messages. Monitors utilize the secure website to oversee their drivers and keep track of check-ins and locations.

Users tell us there are 4 things they like most about using Ok Alone to stay **S.A.F.E.**

S | **Simple to Use** - In testimonial after testimonial we hear drivers say the same thing: "It's so simple to use."

A | **Affordable Price** - Provides a convenient safety solution for your fleet while keeping costs under control.

F | **Fulfills Legal Obligations** - Stay on top of your duty of care and comply with local lone worker legislation.

E | **Engages Your Staff** - Use friendly competition and team work to motivate your staff.

Keep drivers safe with hands-free check-in.

Reduce distracted driving by using "Driver Mode". Data combined from both Geotab and Ok Alone register whether a vehicle is in motion when a check-in is due. The system automatically checks the driver in and shows they are safe, without the driver having to take their hands off the wheel or their focus off the road.
